Educational content	The Value Creators is an educational concept designed to allow students gain experience in their role as change agents, addressing complex issues linked to the Sustainable Development Goals Agenda. Students work together addressing complex issues in close collaboration with professional networks. Value Creators expect students to co-create new approaches to complex issues together with professional networks. We have a special focus in the process, and therefore, next to their final product, students are expected to deliver reports describing their journey based in our own developed 4E-Model. During Value Creators knowledge is not the goal, but a tool. Therefore, and based on the topics students are working on, they would have to find their own sources of knowledge throughout MOOCs, readings or attending professional conferences. These journeys will be presented in the form of a Knowledge Portfolio. We also have created room for the student to reflect at individual level in their own growth as change agents. They can profile further as change agents at professional and personal level. They will present this individual learning path in the format of a Portfolio which will be also graded by themselves.
